

LIFE WAY

of Aleksey Filippovich Tsekhovoy, Doctor of Technical Sciences, Professor of the Department of the Project Management Institute of named after E. Turkebayev of the Kazakh National Research University named after K.I. Satpayev.

Everything that Alexey Filippovich achieved on his life way, he had to achieve through his own efforts, due to the strength of character, the desire to know the world and not to stop there. His generation has had a difficult time. He has something to remember, what to teach the younger generation ...

To what Alexey Filippovich is currently doing, he followed the path of professional development, constant mastering of new knowledge. Having overcome the post-war hardships, in 1959 he entered the Kazakh Mining and Metallurgical Institute, in 1965 he graduated with honors on the specialty "Open development of mineral deposits" and was admitted to the postgraduate study of the Kazakh Polytechnic Institute. In 1969 he defended his PhD work. As a graduate student, Aleksey Filippovich was engaged in teaching activities at the Department of Transport and Mining Machines of the Kazakh Polytechnic Institute and worked at this department until 1994 as a teacher, senior lecturer, associate professor. At the same time, in 1974-1979, he worked as the dean of the engineering and construction general technical faculty, scientific director of the Scientific Research Work Council of the Institute (1982-1984), deputy vice-rector for scientific work (1984-1985), dean of the mining faculty (1985-1990.), Director of the Center for New Information Technologies and Cybernetics of the Institute (1992-1995), First Deputy of the State Attestation Committee of the Republic of Kazakhstan (1995-1997), Head of the Department "Computerization of Technological Processes and Project Management", then Professor of the Project Management Institute of the KazNRTU named after K.I.Satpayev (from 1997 to the present).

In 1992, A.F. Tsekhovoy defended his dissertation at the Moscow Mining Institute on the topic "Technology for managing ore streams of asbestos open pits" and received a doctorate in technical sciences, and in 1996 he was awarded the academic title of professor.

In 1994, at the Mining Faculty of the Kazakh National Technical University, A.F. Tsekhovoy organized the Department of Computerization of Technological Processes and Production (CTPaP). Since 2008, the department has switched to training masters and PhD doctors in project management. Alexey Filippovich made a significant contribution to the creation, formation and development of a number of non-governmental organizations, such as the International Informatization Academy (IIA) since 1994, the Central Asian Mining Union (CAMU) since 1999 and the Project Managers Union of the Republic of Kazakhstan (PMU RK) since 2003. Due to his organizational talent, the work of these associations not only received intensive development, but also acquired a pronounced meaningful character.

Alexey Filippovich devotes great importance to the training of personnel. He not only transfers knowledge, but also constantly replenishes his own. Under his leadership, there was initiated the academic training of masters and PhD doctors in Project Management, a system of advanced training for top managers and specialists in various sectors of the economy in the field of project management was created, the role of which is significant in modern life.

Alexey Filippovich has published over 250 scientific articles, monographs, a large number of essays, brochures addressed to a wide range of readers, especially in the field of project management.

A.F. Tsekhovoy is a versatile person, he is engaged not only in science and educational activities, he also devotes a lot of strength and energy to social and political activities. Being a

member of the Political Council since 2000, and from 2005 to 2019 a member of the Central Control and Auditing Commission of the Nur-Otan party, he took an active part in the development of the party's strategic documents, the Concept for the Development of Civil Society in Kazakhstan for 2006-2011, supervised social and informational projects of the party. As a member of the Assembly of the People of Kazakhstan from 2001 to 2018, he participated in the information and analytical support of the APK. Alexey Filippovich led a number of projects under the UN Development Program in the field of ICT, took part in the organization and holding of a number of international conferences on such important issues as: eliminating the digital inequality, promoting project management. Alexey Filippovich participated in the development and discussion of laws on science, innovation, rules for organizing project activities in the State Planning System.

Being in different periods the Honorary Consul of the Republic of Belarus, a member of the Coordination Council for Work with Non-Governmental Organizations under the Government of the Republic of Kazakhstan, a member of the National Council on the Initiative of Transparency in Subsoil Use, the head of an educational provider (obal R.E.P. Project management institution) in the USA, Mentor of the "Industry Managers" program, he always advocates for reform aimed at consolidating the constructive forces of Kazakhstani society and solving vital social, political and economic development problems of the Republic of Kazakhstan.

Alexey Filippovich still works a lot today, he is distinguished by high professionalism, the basis of which is a constant striving for self-improvement, delighting everybody around him with his energy and creativity. Probably because he has been doing what he loves all his life and work gives him joy, everything in his life develops the way he wants. Alexey Filippovich is an amazingly sympathetic person, he can lend his shoulder at any moment and help.

For many years of fruitful scientific and pedagogical activity A.F. Tsekhovoy was awarded by the Certificate of Honor of the USSR Ministry of Higher Education, and the badges of the USSR Ministry of Higher Education "For excellent success in work". In 2001, the Ministry of Education and Science of the Republic of Kazakhstan awarded him with the "Best Education Worker" badge. In 2007 and according to the results of the International Competition "Altyn Adam" - Man of the Year in Kazakhstan" he was recognized as the winner in the nomination "Scientist". In July 2011, he became the winner in the national industry competition "Golden Hephaestus" in the nomination "Specialist of the Year - Scientist - Educator". Has badges: "Mining glory of the III degree" (2013) and "Mining glory of the II degree" (2014); KazNAU "For contribution to the development of agricultural education, science and production" (2015); Quality star of the national rating agency "For high professionalism" (2020), badges of ICRIAP RK "Ult Kairatkeri" and "Uzdyk Baylanisshi" (2021).

The main goal of his life is the formation of independently-minded, educated, socially responsible members of society.
